March Seminar

Tuesday, 3/25/2003 - 5pm to 8pm

Scripting for Network Professionals

An Overview by Bob La Quey

System Administrators routinely deal with problems that are best handled by writing simple scripts. A plethora of languages exist to perform these tasks. This overview looks at a few simple tasks and shows how they might be handled using various shell scripts, Perl, Python, Tcl. Emphasis will be on practical examples and sources of additional help available for free on the Internet. The class will be o/s agnostic, and be of use to all network professionals

Session will be held at Ascolta San Diego, CA
6363 Greenwich Drive Suite 250
San Diego, CA 92122 Tel: (858) 558-3000
(I-805/Governor exit)

RSVP is desired but not required to academy-sd@npa.org
NPA Academy is a free NPA member benefit.
Non-members \$25 per session.
